Concrete Floor Problems?

There's a wide range of issues that can complicate your flooring, especially when it involves concrete.

Without any expectation you can find yourself facing any number of these concrete problems that draw your production to a grinding halt:

- Wear & Tear
- Drummy Surfaces
- Uneven or sloping surfaces
- Slabs out-of-tolerance for flooring
- Separated materials
- Flooring glues
- Hardened concrete
- Epoxy coatings
- Asbestos glues
- Specialty surfaces.

Being aware of these is the first step to a better end-result.

It's important to know what to do and what needs to be done with these issues when they arise.

Rescues

Our rescue facility ensures clients have us as a go-to if a project turns sour. We'll get you a plan, a product and a price quickly and we'll deliver as soon as humanly possible.

Repairs

Solving and affordably repairing issues of wear & tear, separated materials, drummy surfaces, ageing and irregular concrete.

Renovations

Working with expert experience and specialty tools we can work on or even create a specialty surface just for you.

Levelling

With strong relationships and reputations across greater Victoria, our levelling solutions are exactly that, SOLUTIONS. Ensuring the problem is dealt with sustainably.

Polishing

Whether it's a grind-and-seal, a highly presentable 'HiPERFLOOR', or a custom solution to suit your needs and budget, we do polishing, and we do it well.

Diamond Grinding

This method of floor preparation ensures even surfaces and is an excellent way to remove coatings, glues and resins in preparation for new flooring.

Lifting

Utilizing experience, precision and specialty tools our lifting service takes care of the dusty, difficult, labour-intensive work needed to prepare floors.

Demolition

Our demolition experience includes the destruction and dismantling of debris, cabinetry, carpets, temporary walling, plaster, fibro-board, glass and much more.
